NO PREVIOUS EXPERIENCE REQUIRED

If you're a complete beginner and have no prior hypnosis knowledge, this course is the ideal place to start. You'll learn the fundamentals of hypnosis and hypnotherapy, covering the essential building blocks needed to become a great hypnotherapist, as well as covering some advanced approaches.

During the course, you'll learn how to hypnotise people, and develop an understanding of how to create positive changes on both conscious and subconscious levels, as well as how to help people with a number of different conditions. You'll also learn how to engage and assess clients, how to create your own hypnotherapy scripts, how to set up your hypnotherapy business, and how to make a living as a confident, professional hypnotherapist.

So, whether you're used to working a minimum wage job, or you're already a successfully self-employed business owner, or even if you're a student fresh out of school, no matter your age, your background or your current career, if you want to help people and make a great living whilst you do so, this is the course for you!

ALREADY A HYPNOTIST/ HYPNOTHERAPIST?

Maybe you've already taken some hypnotherapy training elsewhere, or you're looking to up-skill and develop more confidence in yourself as a hypnotherapist? With our in-depth course content and the innovative online-practical training that this course offers, we can help take your practical hypnosis skills and knowledge to the next level!

This course will help you develop your confidence where you need it most, whether that's reliably creating a deep state of hypnosis in your clients, being able to tailor your hypnotherapy sessions and scripts

to each individual client you work with, developing a solid client-intake process, utilising hypnotic phenomena and hypnotherapy techniques, or even as an all-round refresher course, to help you get back in the saddle, and to start helping people again, even better than before!

Wherever you're at right now, if you're ready to supercharge your hypnotherapy skills and further develop your business, then join us live-online, and let us help you reach your hypnotherapy goals! Give us a call if you'd like to check that this course will give you exactly what you need to move forwards with your hypnotic career!

LEARN MORE THAN JUST THE BASICS!

When you learn anything, you need to start off with the basics, and that's fine, because the basics are important. They are the foundation of everything that you will move on to do later. However, just because you're starting with the basics, that doesn't mean you're limited to only knowing the basics!

On this course, as well as learning the basics of hypnosis and hypnotherapy, you'll also learn some more advanced approaches:

Master the art of hypnosis: **Advanced hypnotic inductions**

There are many different ways to hypnotise your clients. As a professional hypnotherapist, it's advisable to have a number of approaches at your disposal, so you can hypnotise any client (even the tricky ones)! During our course, you'll learn various different types of hypnotic inductions, from the standard 'progressive' induction, through to rapid inductions, confusion inductions, pattern interrupt inductions, and many more!

Becoming a hypnotic Jedi: **Working without scripts**

Anyone can read a hypnosis script, you don't need a qualification to do that. However, we know you've got to start somewhere, so when you join the course, you'll get a whole bunch of tried-and-tested hypnosis scripts to draw from. However, you'll also learn how to work 'script-free', which gives you the flexibility to work anywhere, at any time (no scripts required), creating a bespoke solution for every client!

Empowering your therapy client: **Harness the power of self-hypnosis**

As well as being a fantastic tool for your own personal use, self-hypnosis is an integral tool of the expert hypnotherapist. It's important to learn how to teach self-hypnosis to your clients, in order to help them maintain their therapeutic gains, and as a powerful self-help tool that they can use moving forwards beyond the therapy session.

Creating bespoke hypnotherapy sessions: **Advanced therapy session structuring**

Not all problems can be solved in one session, but some definitely can. By understanding when to choose a single session or multiple session approach, your clients will get exactly what they need with you as their hypnotherapist.

BECOME A PROFESSIONAL HYPNOTHERAPIST

Become a detective: **The client consultation**

A hypnotherapy session isn't always as simple as just sitting the client down and doing some hypnosis. Pro hypnotherapists know how to get the right information from a client before the session begins, in order to choose the right therapy approaches to use. This is a skill you'll learn when training with Rory & Kate.

Create comfort with suggestions: **Effective pain management approaches**

As a hypnotherapist, pain management can make up a substantial portion of your client base, and pain management approaches can be applied to many other conditions too, so it's worth learning to do it right. That's why pain management has a special place on our live-online training course!

Take them deep into hypnosis: **Powerful deepening procedures**

Creating a deep state of hypnosis reduces conscious resistance, and allows change to happen on a deeper level, thereby increasing its effectiveness. As well as that, a deep state of hypnosis is a fantastic 'convincer', proving that a client is in hypnosis, rather than leaving them wondering 'was I hypnotised?'

Back to the past: **The age regression process**

Many hypnotherapy schools and trainers do not teach age regression, as it is an advanced technique. However, regression, when performed properly, is a safe and effective way of helping clients gain insight, work through issues, and even harness powerful positive resources from their past. You'll learn how to use age regression safely, and appropriately!

Make a living as a hypnotherapist: **The business of hypnotherapy**

To be a hypnotherapist, you need clients, and to get clients, you need to learn how to run your hypnotherapy practice as a business. So, as well as learning all about how to do therapy, you're also going to learn how to set up your own business, attract customers, establish a business brand, and how to market yourself and your services.
